

# Alessio Paoelli

Giocoleria, Monociclo, Fuoco.

## Technical needs and various details:

The show's main idea is to be light and easy to bring everywhere.

The only needs are:

- A space on the ground or on the stage at least 5m x 5m.
- The roof must be at least 3,5m high.
- Pretty regular Surface on the ground.  
Uncomfortable fields: sand, stones, fresh dirt, extreme downhill.
- My spot light can be battery powered or 220v. The 220 are better, so a plug for night shows would be great.

Anything else is battery powered:  
Amplifier, microphone, music, etc.

I'm regularly subscribed at: "DOC Servizi Roma" which can provide a legal receipt.

Some of my songs can be protected By S.I.A.E. or GEMA.
